

## Mr Stink by David Walliams

I liked this book because it was entertaining in my opinion. This was the first time Walliams took a risk and while it pays off in most places it isn't his best. But first the good things. All the characters are well developed and change as the story progresses, the best of which has to be Mr Stink himself. He has a type of mystery about him you never know what type of antics he'll do next. The story tries to make you guess who he is without giving too much away. The plot is good and has a lot of comedy and lots of unique characters. It doesn't feel stuffed full of undeveloped characters and it's sad in a different way than most Walliams books. The only thing keeping it from five star is Chloe's Mum. Chloe is the main character but her mum is mean spirited and the only bad thing in the whole book. 4 stars.
